

DSP-A005 PLASTIC ADJUSTABLE-LENGTH SEAL

The **DIO DSP-A005** is a low-breaking strength pull-tight seal manufactured from Polypropylene material. The seal can be supplied with a heat rolled-over top to prevent tampering by intrusion into the locking head but if tampering is not the main characteristic the seal can be supplied without this added feature. With a 2mm diameter ribbon, this seal is ideal for applications where there are small sealing apertures.

Recommended Applications

Catering Trolleys, Baggage, ATM
