

DSMS-TW002 TWISTER SEAL

The **DIO DSMS-TW002** Twister Seal is a two part Polycarbonate wire seal that offers an alternative to lead and plastic wire seals but has the added advantage that it can be applied without the use of a sealing tool. The seal is applied by threading the wire through the two holes of the transparent and coloured pieces and by turning the insert clockwise the wire is twisted around the inner cores until secure at which time the handle is broken off. Used with spiral soft galvanized, stainless or nylon coated wire, this seal, with its transparent body and coloured insert offers a visual control of integrity and colour coding

Recommended Applications

Electric, Gas and Water meters, Drums, Totes, Petrol Pumps, Taxi meters, Weighing scales

Tag Marking Dimension

20mm*8mm

Dimensions

Refer to Figure: 2

Material

Body - Polycarbonate
Insert - ABS

Marking

Laser or Foil marking Consecutively numbered as standard
Optional Customer Name/Logo
Optional Laser Barcoding

Packaging

Standard Packaging : 5,000 seals/carton (50 polybags)

Available Wire

Wire - 0.7mm diameter (Standard Length 30cm) Material- Galvanized, Stainless or Nylon coated Reels or other cut lengths may be available on request
